

QUALITY POLICY

Curtis Machine Tools Limited is committed to the design and manufacture of high quality electro-mechanical machines that comply with customers' stated or implied requirements, our own product specifications and any applicable legal requirements. These are considered to be the company's principal quality objectives, and are measured by monitoring after sales information and legal challenges.

To this end the company operates a quality management system to meet the requirements of ISO-9001:2008. This is implemented in all areas and functions that have an affect on quality and will be monitored both internally and by an independent accredited certification body. Whenever appropriate the system will be updated to improve its effectiveness in achieving the quality objectives.

This policy is subject to annual review to ensure that it remains appropriate and to reconsider quality objectives that may arise as the business progresses.

M. SCARFE
MANAGING DIRECTOR

DISTRIBUTION: This quality policy is communicated throughout the organisation as part of induction training for personnel and by inclusion on the general company noticeboard(s). A full copy of the Quality Manual is held by the Managing Director/QA Manager and is available to any member of staff upon request.
